AGENDA GREENAUTO - GREEN INNOVATION FOR THE AUTOMOTIVE INDUSTRY

TOTAL AGENDA INVESTMENT | 118.461.005€

SAFE-LIFE INVESTMENT | 26.718.057€

INITIATIVE | Green Agendas for Business Innovation

BENEFICIARY ENTITY | Safe-Life - Indústria de Componentes de Segurança Automóvel, Lda.

STAR DATE | 01-10-2021

CONCLUSION DATE | 31-12-2025

TOTAL ELEGIBLE COST | 26.718.057€

TOTAL FINANCIAL INCENTIVE FOR THE AGENDA | 59.812.630€

FINANCIAL INCENTIVE FOR SAFE-LIFE | 8.259.210€

OBJECTIVES AND EXPECTED RESULTS

The GreenAuto Agenda aims to position the national automotive industry in the value chain of low-emission vehicles. To achieve this goal, the Agenda proposes the development of innovative, digital and sustainable products and processes associated with the manufacture of automobiles and their components.

Safe-Life's participation consists in creating industrial capabilities to manufacture new airbag modules (PPS 5), a critical system for car safety. The actions also involve the research and development of a methodology that allows the introduction of the concept of macros in the airbag bag design software as well as the introduction into the market of airbag bags perfectly adapted to factors such as the architecture of each vehicle and its inertia during moments of the accident, combining new bag designs and folding solutions, with more compact and lighter housings.
